

Guidelines on the Use of Insect Repellent Spray

Applying on body

1. Hold 15 to 20cm away from skin and spray in a slow sweeping motion

2. Spread evenly on exposed skin

3. Spray on clothing to prevent bites through clothing

Applying on face and neck

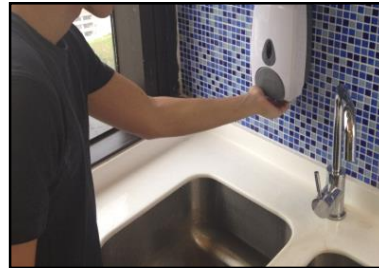

1. Spray on palm of hand

2. Spread evenly on palm

3. Pat around face and neck, avoid eye and mouth areas

To remove from skin

1. Clean treated skin with soap

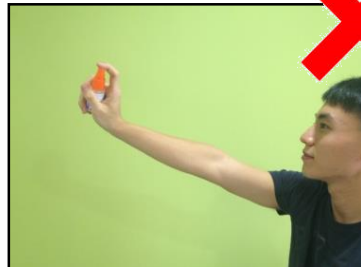

2. Rinse thoroughly to remove repellent residue

Do NOT apply to eyes and mouth

Do NOT spray into the air

Other Precautions

- Do not over-spray, use just enough to cover exposed skin and clothing
- Do not use beyond its expiry date
- Do not use on skin with cuts, wounds or any skin irritation
- Wash hands with soap immediately after being in contact with the solution
